ABOUT ME

Hard-working and detail-oriented full stack web developer with programming experience and passion for web application development. Looking for growth opportunities to apply new technologies to projects and hone technical skill set in a team-based atmosphere.

TECHNICAL SKILLS

○ **Technologies**
HTLM5, CSS3, Javascripts, Python, Node, Express

○ **Tools**
Visual Studio Code, Git Version Control

○ **Frameworks/Libraries**
React, Flask, Django, Jquery, Bootstrap

○ **Database**
MySQL, SQLite, MongoDB, Redis

SOFT SKILLS

○ Ability to work under pressure

○ Adaptability

○ Decision making

○ Problem Solving

PERSONAL PROJECTS

Real-time Chat Web Application

🔗 github.com/cao-trong-le/rt_chat_app

○ Built a responsive web application using Django and React that allows users to post content, text with each other within chat groups in real time

○ Built real-time features such as user notification, and befriending and invite request using Channels python packages

○ Created a verifying feature to identify users and keep track of users' activities

○ Encrypt users' sensitive data

○ Utilized OAuth REST API to allow users to login with their social media accounts

○ Applied programming technologies such as Python, Javascripts, React, SQLite, HTML5/CSS3

Fast Food E-Commerce Web Application

🔗 github.com/cao-trong-le/pizza_app

○ Built a responsive web application using Django and React that allows users to order pizza and other kinds of fast food online

○ Created tasks scheduling features running in web app background to fetch, update customers' order and send emails to customers periodically

○ Applied Goolge API to web app that helps user find nearby restaurants

○ Built a payment feature allowing customers to do payment online using Stripe package

○ Utilized OAuth REST API to allow users to login with their social media accounts

○ Used Django, Javascripts, React, SQLite, HTML5/CSS3

RELEVANT EXPERIENCE

Freelance Content Marketer

EduTrust **Jul 2021 - Present**

○ Applied programming technique such as data scraping and analysis to selecting commonly-searched keywords related to company's products
○ Created and posted marketing content for company's services based on level of customer interest

Freelance Full Stack Web Developer

Independent Freelancer **Aug 2019 - Present**

○ Designed and created client websites from scratch using current technologies and design trends while optimizing content for mobile and cross browser performance
○ Personally consulted clients with design suggestions and hosting recommendations to create designs based on client requests and business needs
○ Fixed and debugged glitches and programming issues related to design and programming of websites
○ Applied new functionalities and features such as real-time chat, Google analytics, and background tasks scheduling to commercial websites
○ Taught fundamental programming languages, concepts and commonly-used web technologies to high school and middle school students

EDUCATION

Computer Science Diploma

Lambton College | May 2021

Toronto, ON

○ 3.4 GPA
○ Completed coursework in system administration, web design, client-side development, and database programming
